

MRS. CZIKRAY
SOCIOLOGY 2
ASSIGNMENT SHEET

INTRODUCTION

Sociology is the science that studies human society and social behavior. Sociologists tend to focus on groups rather than on individuals because sociology mainly is interested in social interaction. The sociological perspective enables us to look below the surface of social life and examine the factors that shape our behavior, our attitudes, and our beliefs. Rather than relying on common sense, which often turns out to be incorrect, sociology teaches us to look at social life in a scientific, systematic way. Sociology 2 is a continuation of the Sociology 1. We will focus on areas of social class, race, gender, age, social institutions, etc.

Materials

Students need a notebook for note taking and a folder to carry all assignments and readings.

Homework

Most assignments are in class due to the nature of the material. Homework assignments are not as frequent as other classes. Study guides for tests are included in chapter packets.
