“Café Terrace at Night”

Submitted by Abbie Owens, 2014

Supplies needed to create Café Terrace at Night

White construction paper

Yellow foam to cut out café roof (I had these cut out and ready for the students to paste)

Photo copies of the tables and chairs to paste on white construction paper

Blue construction paper in the shape of a door

Shred green construction paper for the leaves of the trees

Have the children glue cut out shapes in the appropriate areas on white construction paper. I told the students to imagine a scene they would like to see at a café and draw that scene with crayons to the right of the café.
