

Mayfield City Schools

EVERY STUDENT. EVERY DAY.

December 30, 2020

Dear Mayfield City Schools Teachers, Staff, Parents and Community,

The Mayfield City School District continues to work closely with the Cuyahoga County Board of Health (CCBH) to ensure a safe school year. Part of this planning includes the steps we take when we learn someone in our school community tests positive for COVID-19.

Today, the district was notified of 2 positive COVID-19 cases involving 2 Mayfield High School staff members. These cases are unrelated. In accordance with the established protocols set forth by the CCBH, the staff members will remain at home for 10 days and may return to school / school activities, if symptom free without the use of medication. Those who were in contact with these cases have already been contact traced and notified. Those involved will not return to school, work or activities until their quarantine period expires and they are symptom free without the use of medications.

We are doing all we can to continue to provide the in-person learning option in all of our schools. Please visit our COVID-19 resources to read more about our protocols, safety measures and to review the updated COVID-19 dashboard.
