

## 3<sup>rd</sup> Grade Matter Project

For the past several weeks, we have been learning all about matter in science class. We have learned what matter is, the 3 states of matter, what the molecules in each state look like, and many examples of each state of matter. Your next science assignment is to complete a project at home all about matter!

The project needs to include the following:

- Project must be on the topic of matter
- Project must include at least 1 visual component
- Project must include at least 1 written component

This project will also be used as a portion of your science grade this quarter, so it is important to try your best and show what you know about matter. Some ideas could be making a poster, making a shoe box diorama, or making a mobile. The possibilities are endless! **BE CREATIVE and HAVE FUN!!!**

This project is due on: \_\_\_\_\_ March 4<sup>th</sup> \_\_\_\_\_

Students will also have an opportunity to share these projects at the Science Showcase on March 12<sup>th</sup> at the Mayfield High School from 6:00-8:00 P.M! Please ask your science teacher if you have any questions!
